

OPEN STANDARDS IN MOBILE COMMUNICATIONS ENABLE PEOPLE AND DEVICES TO CONNECT AROUND THE GLOBE

European contributors depend on patent royalties to continue developing technology for open standards, like 5G and the IoT

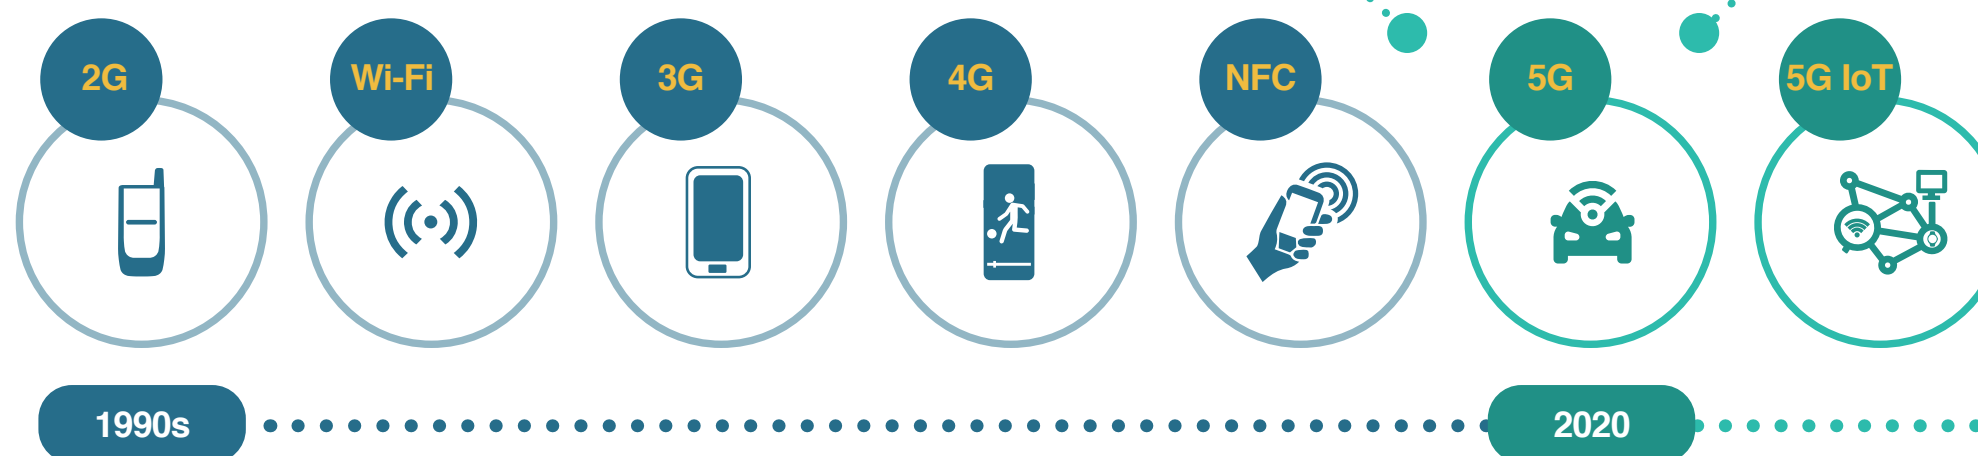

Innovative companies contribute their best technologies, driving interoperability, greater competition and product innovation

There are 5.2 billion mobile subscribers and around 1.4 billion smartphones sold every year.

This revolution was enabled by access to open standards created by R&D-intensive companies

If Europe wants to continue leading in 5G and the IoT it must support open standards

OPEN STANDARDS CREATE A PLATFORM FOR ALL EUROPEAN COMPANIES TO COMPETE WITH THE GLOBAL GIANTS IN 5G & IoT
